BELDING. MICHIGAN

### WAY TO SUCCESS.

The man who undertakes to accomplish too many things at the same time generally pays a high toll in the end. He may succeed for a while, but he does so at fearful risks and without properly reckoning the cost to himself. He is the exception, though, rather than the rule and often "makes good" at the expense of his physical and mental well being, says the Charleston News and Courier. Giants among men are rarities even in this day of surprising developments and record achievements, and as a rule the man who follows one line of work with close attention and conscientious regard will lay by for himself greater success and more enduring results than he who dabbles in any undertaking that may come his way. It is not an easy thing to shut ourselves away from tempting influences and conditions that may appeal to us, but having once fitted ourselves to do a certain work, and having expended time and energy in its accomplishment, it is only natural to suppose that we can obtain more certain results by developing it to the best of our ability. Sometimes the way is hard; long hours of application are necessary, but often when we least expect it the clouds begin to lift and we see the realization of the promises for which we have labored.

What clever prankishness was that of the boys of West Lafayette college, Ohio, who put oil in the milk for the girls' dormitory, causing twenty of the co-eds to become so ill as to require the attendance of physicians? They were nearly as daring as the young men of the Pacific coast institution of learning who raided the girls' dormitories and frightened some of the occupants into hysterics by pulling them out of bed. The twentieth century young man does many things that would hardly have occurred in any earlier age. Is it because of the disappearance of the birch as an aid to education?

An automobile in New York picked up a stone in its wheel and flung it into a window, almost striking some persons. The automobile is perhaps the most striking instance of the innate depravity of inanimate things. It has been known to try to climb a tree or a lamp post and to turn somersaults in the open, to say nothing of its running down the general public. But now it has taken to throwing stones at people, something imperative toward curbing its impetuosity will have to be done.

We are accused of being the most wildly speculative nation in the world. But in the year London has run wild over the rubber craze, then went through a boom in oil shares, and has finally turned to a bull gamble in British railroads. The United States has, on the other hand, practically stopped speculation, perhaps for the sufficient reason that the lamba had no more fleece to shear.

The golden anklet with bangles has appeared in Chicago. This is probably a decoration intended to go with the harem skirt and shows again the inconsistency of the feminine mind. While the inhabitants of the eastern harems are taking to Paris styles western women are looking for their fashions to the Orient.

People who live in New York complain that the place is becoming too noisy at night. The people who make the noise will find it difficult to understand why men and women who long for peace and quiet insist on living in New York.

Members of a club in Atlanta say they will go to jail before they will tell what they know of women drinking in the club. The poet was mistaken. The world's male chivalry has not perished out. It has joined the Atlanta club.

It may be that a woman must put her soul into her dress in order to look well, but, at the same time, a good deal of importance rests on the sort of a physique she is able to put into it.

Far be it from us to arouse slumbering trouble, but what has become of the tight trousers and padless coats with which we were threatened a few months ago?

At Newark, N. J., a lawyer charged his fair client \$500 for reading a bundle of love letters, and she is complaining. She should have hired a women lawyer and had them read for nothing.

An English author was fined in New York the other day after he had received a wallop on the eye for trying to flirt with a pretty damsel. We have no doubt that he will write a book entitled "Seeing America."

## VOLCANOE ADD TO MEXICAN DISASTER

DEVASTATED FROM COAST TO COAST AND THE PEOPLE WILD WITH TERROR.

THE DEATH ROLL NUMBERS FAR MORE THAN FIRST REPORTS.

Volcanoes Are in Eruption and Lava Flows From the Belching Craters.

From coast to coast Mexico is devastated by the earthquake, and to add to the terror of the inhabitants the volcanoes Colima and Popocatepetl are now in full eruption. Great cones of smoke hover over the craters and lava pours down their sides into cities and towns.

The death list, placed now at 1,456, is growing, and word is yet to be received from the isthmus of Tehuantepec, which was shaken from end to end.

The famous floating gardens of the Montezumas, situated on an island in Lake Xochimilco, are no more. Gardens, homes, inhabitants, island and all are sunken beneath the surface of the lake. How many victims were claimed by the earthquake there no one can say, but comparatively few if any of the natives are believed to have escaped. The inhabitants of this island are direct descendants of the Aztecs and of pure, unmixed blood. They raised and sold nearly all the flowers and vegetable for the markets of Mexico City. Now they and their homes and their products are no more.

The list of casualties is pouring in to Mexico City from Tacula, Tacabaja, San Anle, Zacaotzaco, Tlalpam, Pinon and all places in the immediate vicinity of the capital. The port of Manzanillo, state of Colima, that cost \$14,000,000 to build, is badly damaged. Twenty-two persons were killed there. No Americans were killed or injured by the earthquake in Mexico.

The volcano Colima, the center of the seismic disturbance, is one of the most troublesome of the Mexican volcanoes. It is situated in the southern part of the state of Jalisco and is 12,278 feet high. History mentions violent eruptions dating back to the sixteenth century. Since the summer of 1869 the volcano, with the exception of a few brief periods of quiescence, has been in a disturbed state. The eruption of 1896 produced a strong earthquake which did much damage. The eruptions of 1902 and 1909 were spectacular, but less devastating.

### Saved by a Joker.

Just as the government is sitting for the biggest legal game it ever played, the discovery is made that it is bound to lose and the Southern Pacific railroad to win \$500,000,000 if the play goes on. The stakes are a great area of California's richest oil lands. They were granted to the railroad, with a clause in the grant expressly excepting all mineral lands save those containing coal and iron. Most of these lands were patented to the grantee more than six years ago. The joker in the situation is a special statute of limitation, slipped through congress in an act of March 3, 1891, and perfected by another act of March 2, 1896. The effect of these acts, as construed by the United States supreme court, is absolutely to bar proceedings by the government to annul a patent to land granted railroads after six years from the issuance of the patent. The patent is repealed, the government has not a chance on earth to get back the lands.

### NEW PRIME MINISTER OF CHINA

Prince Ching Is Known as Crafty, Evasive and Inefficient Official.

Prince Ching, recently made prime minister of China, with a cabinet ministry ostensibly to assist him, is one of China's newest, largest problems. The cabinet succeeds the ancient "grand council," which is abolished by the substitution.

Prince Ching has been for years the most conspicuous and the most notorious figure in China. The story of his life is the story of China for the past 27 years—the story of the most disastrous experience in the history of the empire. From those disasters China is now emerging chastened and strengthened; her future, under new methods of government, is rich with promise. Whether constitutional development can be guided satisfactorily by a decrepit old man, irresolute, wily, corrupt, and inefficient, is a question which may be disputed.

### Slays Wife: Cuts Own Throat.

Enraged because his wife, who had sued him for a divorce, obtained an injunction restraining him from entering her home or in any way interfering with her, K. Bert Ingles, aged 45, a plumber, went to the rooming house kept by his wife in Grand Rapids, and stabbed her to death with a pocketknife. Ingles then attempted to kill himself by slashing his throat with the same weapon. He is in a hospital and will probably recover.

William M. Sloane, Seth Low professor of history in Columbia university, has been appointed to fill the Theodore Roosevelt professorship at the University of Berlin for the academic year of 1911-12 by the trustees of Columbia university.

President Taft has accepted an invitation to visit the Appalachian exposition at Knoxville, Tenn., some time between September 12 and September 20. He will start his western trip which already promises to extend as far as Utah by a swing into the south.

## NEW MICHIGAN CONGRESSMAN

John M. C. Smith of Charlotte, Mich., is serving his first term in congress and promises to be an active factor in the national legislature. He was born in Ireland in 1855, but came to America when but two years of age. He was educated in the University of Michigan and has been a painter, farmer, mason, lawyer, banker and manufacturer. Mr. Smith is a Republican and represents the Third Michigan district.

### Laurier Invited to State Fair.

Another big attraction for Detroit and the Michigan State Fair, in the person of Sir Wilfrid Laurier, Premier of Canada, is being sought. Several days ago President T. E. Newton of the State Fair Society received some pretty good assurances from influential Canadians that Sir Wilfrid would very much like to visit Detroit and Michigan on the occasion of President Taft's visit here. If he could possibly arrange his affairs to make the trip, Mr. Newton very promptly conferred with people across the border, with the result that a formal invitation was extended the premier, through A. H. Clarke, M. P., of Windsor, to visit Detroit and the State Fair on the same date President Taft is to be there, September 13 or 19.

### Says He Bought Girl for \$37.

Phil Arbestag, a Benton Harbor basketmaker, appeared at the farm home of Charles Freund, south of Benton Harbor, and asked that one of the berry pickers, Lena Lick, a 16-year-old Russian girl, be turned over to him. He presented the astounding claim that he had purchased the girl for the sum of \$37. When his demands were refused he left and later returned with the mother of the girl, who is said to have substantiated Arbestag's charge. Permission to take the girl was denied and the case was placed in the hands of the officers.

The girl is a pretty miss and tells of a hard life.

### May Crop Report.

According to the May crop report as issued by the secretary of state heavy frosts during the first week of May destroyed considerable fruit in the northern portion of the state. Many leading varieties of winter apples did not blossom very heavily, consequently the prospect for a good yield is not very promising, early apples promise a fair yield. The crop report shows that the acreage planted to sugar beets in the state this year exceeds that of any year for the past five years. The average condition of wheat is 91, in the southern counties 90, in the central counties and, upper peninsula 96 and in the northern counties 87.

### State Tax Commission Names U. of M. Professor.

D. Friday, professor of economics of the University of Michigan, has been named by the state tax inquiry commission to have complete charge of the statistical work of the commission, and the professor will open an office in Lansing and commence the work at once. The commission, which is composed of P. H. Kelley, of Lansing; Prof. Adams, of the University of Michigan, and Roger I. Wykes, of Grand Rapids, have the work well under way.

### Port Huron to Be a Military Camp.

General orders issued from the adjutant general's department say that every branch in the state's military equipment must report at the annual encampment at Port Huron August 9 to 18. This includes the infantry brigade, the First cavalry, battery A, signal corps, hospital corps, and engineers' company.

This will be the first time in several years that all arms of the service have been assembled at the same time at one camp.

The demurrer of the Grand Trunk Railroad Co. in the case brought against the company by the state at Grand Rapids for the collection of \$1,000,000 back taxes, was overruled and the court granted the company until June 15 to answer the complaint.

If a town has more than one saloon for every 500 people and one saloonist should not ask for a renewal of his license at the end of the year, could another man step in and secure a license in his place? The circuit court says, "Yes." The supreme court will review such a case coming from Bangor, Bay county.

### Months May Pass Ere Toll Is Known.

Because of lack of telegraph facilities and slowness with which the officials of villages in outlying districts make reports to the government, it is not improbable months may pass before an accurate statement of the number of earthquake victims is known.

Special dispatches indicate that the greatest loss of life was near the west coast in Colima and Jalisco, although no deaths are reported from Guadalajara, the capital of Jalisco.

Tonala and San Andres, near Colima, were almost destroyed, according to reports. No estimate of the loss of life has been given.

### Souvenirs of the Maine.

"When the battleship Maine is raised from Havana harbor, break it up, convert the iron and steel into souvenirs for sale to the American people, and with the proceeds erect the proposed Spanish war memorial bridge across the Potomac."

So suggests Bert Kennedy, of Grand Ledge, Mich., 23 years an employee of the house.

Rep. Sulzer of New York, chairman of the foreign relations committee, instantly declared: "I'll bring in a bill to that effect."

### NEWS IN BRIEF.

Gov. Dix of New York has signed a law prohibiting the sale of hypodermic syringes or needles at retail.

The smuggling of Chinamen to the United States has started again. Two Celestials were found hidden in a fruit steamer at Kingston, Jamaica, bound for New York. They declared that they had paid big money to get to the United States.

Gov. Hay of Washington today was informed that while President Taft does not contemplate a visit to the Pacific coast, he will give careful consideration to an invitation to visit that state when the schedule of his September trip is taken up.

A Chicago, Rock Island & Pacific passenger train ran into an open switch in the yards in Peoria, Ill., wrecking two engines standing on a side track and the engine of the passenger train. Engineer Robert Atkinson was fatally hurt and the other two engineers were seriously injured.

## MRS. CARRIE NATION DEAD.

Famous Wielder of Hatchet Dies a Mental Wreck in a Sanitarium.

Carrie Nation, who gained celebrity by her use of a hatchet in the cause of prohibition, died in Leavenworth, Kas., in the Evergreen sanitarium. She was admitted to the sanitarium January 22 suffering from nervous breakdown.

Although it has been reported several times that she was dead, her death was not expected until several days ago.

Mrs. Nation in the sanitarium was incapable of even managing her own business affairs. All trace of the bold prohibition worker had disappeared when her iron constitution began to fail and she spent the last five months of her life in seclusion, no one but relatives and hospital attendants being allowed to see her. When told several days ago that she would die, Mrs. Nation made no comment. Only Dr. A. L. Suwalky and a nurse were with her when death came.

Cipriano Castro, the exiled president of Venezuela, who is said to be planning a return to his native country, is now reported to be at Gibraltar.

Joseph D. Bren, former cashier of the University of Minnesota, at Minneapolis, who was arrested charged with being short in his accounts, has been rearrested and his bail was raised from \$2,500 to \$10,000.

Special legislative measures are contemplated for the regulation and improvement of transoceanic emigration. For that reason the Italian ambassadors at Washington and at Buenos Aires have been summoned to Rome.

## BUNCHING HIS HARD LUCK

Sufferer From Toothache Summoned Philosophy to His Aid During Period of Trouble.

"Philosophers are not all dead yet," said the dentist. "I met one this morning who knocked me out of two hours' work on a day when I have nothing to do anyhow, and will make me work overtime tomorrow, when I shall be crowded with engagements. He was howling with a toothache."

"Better come around and have it attended to," I said.

"Can't do it today," he said, "I'm too busy."

"But you can't work when you are crazy with the toothache?" I argued.

"Oh, yes I can," said he. "There are half a dozen other things I want done to me that hurt pretty bad, and if I have them done when my tooth is on the rampage they won't seem so bad, because one hurt will neutralize the other. I always take advantage of a toothache to dispatch those disagreeable jobs."

"Maybe not many people could stand that kind of philosophy, but apparently that man is going to get away with it."

### THE IDEA.

Peggy—Didn't the lawyer know you were an actress?

Kitty—Gracious, no! He offered to get my divorce without any publicity.

### That Might Be Inducement.

It was during a hot spell and on the hottest night of the week that a South side teacher took a number of her little charges for a car ride. In the public square they piled out and were marched to the telescope set up by a man who vends peeps at the heavenly bodies as so much per peep. The children were told that they might look at the moon, a little lecture accompanying the lesson that the moon was a cold body.

"Teacher," spoke up one little South side, "when you look through the glass, does your face get cold?"—Cleveland Leader.

### What Was She Wearing?

The new fireman was telling his wife about the fire.

"It broke out at midnight in the Von Biffers' house on the avenue," he said, "and just as we got there Miss Von Biffer came stumbling out of the flames and smoke carrying her little niece all wrapped up in her arms. It was the bravest act I ever saw."

"What was she wearing?" inquired the fireman's wife.

### Ungracious Drops.

Stella—Did they give the bride a shower?

Bella—Well, all her friends threw cold water on the bridegroom.

Many self-made men forget to make themselves agreeable.

When a laxative is needed, take the always potent Garfield Tea. Composed of Herbs.

Some people seem to make a specialty of thinking only near-thoughts.

## WOMEN MAY AVOID OPERATIONS

By taking Lydia E. Pinkham's Vegetable Compound

The following letter from Mrs. Orville Rock will prove how unwise it is for women to submit to the dangers of a surgical operation when it may be avoided by taking Lydia E. Pinkham's Vegetable Compound. She was four weeks in the hospital and came home suffering worse than before.

Here is her own statement.

Paw Paw, Mich.—"Two years ago I suffered very severely with a displacement. I could not get on my feet for a long time. My physician treated me for seven months without much relief and at last sent me to Ann Arbor for an operation. I was there four weeks and came home suffering worse than before. My mother advised me to try Lydia E. Pinkham's Vegetable Compound, and I did. Today I am well and strong and do all my own housework. I owe my health to Lydia E. Pinkham's Vegetable Compound and advise my friends who are afflicted with any female complaint to try it."—Mrs. ORVILLE ROCK, R. R. No. 5, Paw Paw, Michigan.

If you are ill do not drag along until an operation is necessary, but at once take Lydia E. Pinkham's Vegetable Compound.

For thirty years it has been the standard remedy for women's ills, and has positively restored the health of thousands of women. Why don't you try it?
